Your Network May Be at Risk!

I'm Den Locke, President of a local IT firm that specializes in Business IT Support. Even if you already employ an IT provider or maintain an IT Department, our independent Network Audit is a valuable resource to your company. Having an independent IT firm audit your network provides you with an objective evaluation of your existing IT network. The audit will offer additional insights, expose potential problems, and give you peace of mind. Locke Systems provides Free Network Audits because we want to be your trusted partner for Managed IT Services and future IT projects if the need arises.

We're offering a **FREE Computer Network Audit and Analysis** to help you maintain your company's profitability and security, with no obligation to you.

Our clients consistently benefit from:

- **Critical Network Support** - Guaranteed response and resolution times to IT issues
- **Proactive Monitoring** – Provide 24/7 monitoring to fix IT issues to protect your valuable revenue streams
- **Improved Network Reliability** – Our IT experts ensure that your systems are rock-solid and problem-free.
- **Reduced IT Network Costs** – Get your IT projects done and on track without breaking the bank. Take advantage of one of our fixed monthly fee service plans.

Even if you are perfectly happy with your IT situation at the moment, please keep my card on file just in case your needs change. I look forward to hearing from you. You can find us on the Internet at www.lockesystems.com.

Den Locke, Owner – Locke Systems
